

2. The primal pattern of all the modifications of a part
9. Man does not hamper himself in his invention of any common type
- 10 Final cause not sole governing principle 14, 37
- 13 Limited comparison of hand of mole, Bat & Fish
- 33 In Elk rudimentary hoofs of use in marshy ground
- 35 Abortion of one toe variable in Orang
- 39 A desire to ascend to cause of Homologies
- 40 on Head of human fetus found of pieces for partition not applicable? Check
45. Horses legs & Lepidosiren good contrast of simplicity for abortion & original
- 45 any rudiment of Petrus in Whales - 78 rudimentary limbs in Boa
- 82 Lepidosiren realize nearly ideal Archetype (see my remarks at end of volume)
84. Some think falsely ^(I agree) that conformity of plan is opposed to ideas of Design.
- 86 Alludes in grandiloquent sentence to some law governing progression, guided by archetypal light - or. -
- 99 Vertebra of head & throat first developed
- 103 on variability of coherence of segments of Vertebrae.
- 115 Rudimentary tail proportionally longer in embryo man, than subsequently.

535

I look at Owen's Archetype as more than
ideal, as a real representation as far as
the most consummate skill & highest
physiology can represent the parent
form of the Vertebrata. —

I follow him that there is a center archetype, the
parent of its class
